The reader of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address,

NEWSY NOTES FROM NATURE'S GREAT HIGHWAY.

The Queen City will pass up for Pittsburgh tomorrow night.

The Keystone State passed up last night for Pittsburgh with a good trip.

There are prospects now of a complete resumption of navigation on the Ohio river.

A packet will leave Cincinnati Saturday for Memphis, the first one for seven long months.

The fare from Cincinnati to Maysville on the Charles B. Pearce is 50 cents and to Portsmouth \$1.

The stock of coal at New Orleans approximately 150 boats, and it is selling at 35 cents per barrel.

It has been more than six months since a tow of Pittsburgh coal has been delivered at Louisville.

Barges lying at Point Pleasant are being lightened up to allow a shipment of coal from the Kanawha.

Captain John A. Wood of Pittsburgh predicts that there will not be a coalboat stage in the Ohio until between December 10th and 15th.

There is a nice rise coming out of the Monongahela, and when yesterday's rain gets into the river good and strong there'll be a nice rise all along.

The big steamer Natchez, with a heavy cargo of cotton, sunk at 8 o'clock Monday morning at Ford's Crossing, ten miles below Vicksburg, Miss. This boat was built in 1891, and is owned by Captain Leathers of New Orleans. She was engaged in carrying cotton from the barge to New Orleans. It is not known whether she can be raised or not. The Natchez was insured.

The crew of the new packet, Charles B. Pearce, is as follows: Captain G. W. Edgington; clerks, Dr. Edwin Smith and Fred Edgington; engineers, Marshal Ellis and William D. Burr; pilots, Arch and Drew Edgington; mates, John T. Seever and Charles Vaughn. The boat is 140 feet long, 32 feet wide and has a capacity of 300 tons. The patronage bestowed upon the Pearce is larger than Captain Edgington anticipated, and her business is constantly increasing. The Pearce is a fine new boat, and her officers and crew are very accommodating to the boat's patrons.

The progress of the towboat Relief, which left Pittsburgh Tuesday with a light tow of coal for the Cincinnati market, will be watched with much interest. The general theory is that a stage of 7 1/2 feet of water is needed at Pittsburgh before it is safe to start with a tow of coal South. The Relief is coming on a little more than 5 1/2 feet. The boat selected to bring this first tow is well named, as the receipt of any small quantity of Pittsburgh coal at this time is in the nature of a relief to that market, which has had no acquisition since last May. She has nine light barges, aggregating 100,000 bushels.
